SKILLS & TECHNOLOGIES

Python Node.js React JavaScript TypeScript Next.js PHP Laravel SQL REST APIs Docker Linux Git Tailwind CSS Godot Claude

WORK EXPERIENCE

Custom Software Engineering Sr Analyst

Nov 2025 – Present

Accenture · Full-time

Python Node.js AI Ops

Under GenWizard's Japan Innovation team, focused on cloud operations, automation, and integration, supporting AI-driven systems from development to production using Python, Node.js, and AI technologies, while collaborating with Japanese clients and colleagues.

Back End Developer

Apr 2025 – Sep 2025

KodeTeQ Business Solutions Inc. · Full-time

Laravel PHP SQL Docker MKDocs

Designed the database and developed the backend of an Event Ticketing System using Laravel and Maya Checkout with webhooks. Assisted in integrating a third-party casino game provider into the games management platform. Initiated in-house documentation using MKDocs.

Game Developer / Programmer

Feb 2022 – Mar 2025

Across Lunacia · Freelance

Godot GDScript Python Laravel Linux MySQL

Built polished, playable demos in Godot with narrative and combat systems. Built a Python Discord bot and Laravel API to manage hundreds of public tester accounts and integrate with Sky Mavis' APIs. Deployed and managed Linux servers and MySQL on DigitalOcean for testing environments.

Software Developer

Jun 2021 – Feb 2022

MegaXcess IT Solutions Inc. · Full-time

Laravel PHP SQL

Focused on backend development using Laravel; built and maintained web applications supporting internal operations and client-facing platforms.

Web Developer

Dec 2020 – May 2021

Belvedere Vista Corporation · Freelance

Laravel PHP SQL Linux

Developed a Laravel-based backoffice system handling thousands of daily accounting records and detailed reports, streamlining operations and reducing manual workload. Helped secure production servers against daily attacks through system hardening and proactive monitoring.

Web Developer

Feb 2019 – Dec 2020

Wyvern Innovations · Full-time

Laravel PHP JavaScript Python SQL

Founding member of the startup. Developed websites and apps for various clients from planning through deployment. Wrote Python scripts for test automation and data analysis.

Web Developer

Jun 2018 – Sep 2020

Omnibus Technologies Inc. · Full-time

Laravel PHP SQL

Developed a law firm management system using Laravel to streamline client records, case tracking, and billing — the core product that earned the startup a spot in IdeaSpace, a competitive startup incubation program in the Philippines.

Intern

Dec 2017 – Apr 2018

UP Information Technology Development Center (UPITDC)

Django Bootstrap Git

Assisted in web development projects using Django and Bootstrap. Gained foundational experience in customer support and agile workflows.

EDUCATION

Bachelor of Science in Computer Science

Adamson University · 2014–2018

THESIS

Influencing Game Dynamics in a Roguelike Game Through Procedural Content Generation Using Genetic Algorithm

2017 · Used genetic algorithms to enhance PCG in roguelike games.
